

PRESS RELEASE 11th April 2005

**BORN FROM PAIN
ALBUM RELEASE AND UK TOUR, JUNE 2005**

Formed in 1997, Born From Pain has been a leading hardcore force on the circuit since the outset. Their crushing sound and burning enthusiasm has won them fans across the world and their raging live performances are famed for their neck-braking pace and relentless brutality.

Born From Pain is about to release their fourth CD, which marks a major milestone in the chronicle of the band. Drawing upon the musical spirit that gave hardcore its original immensity in the early nineties, the album showcases variety, freshness and a no-holds-barred approach to personal experience and social politics. The album embodies the energetic and uncompromising metal influences and progressive NY-style hardcore that the band have perfected and made entirely their own.

The band is immensely happy with, and proud of, the new record, which was made at Tue Madsen's Antfarm Studio, where the seminal "Sands of Time" was recorded. They are confident that this album has taken their music to the next level. Its release, part of a new, worldwide deal with Metal Blade Records, has been confirmed for April 18th 2005 and a parallel release in the US, Japan and Europe ensures that it will be snapped-up by legions of fans across the globe.

And celebrating the release of the album on this side of the Atlantic, the band is currently in the midst of an extensive European tour taking in The Netherlands, Italy, Portugal, Germany, France, Sweden, Denmark, Norway, Slovakia and Belgium, for the prestigious Durbury festival.

Born From Pain has played myriad jaw-dropping live shows over the years with a host of hardcore and metal acts. They have always garnered a great response from critics and fans and approach every tour with the same unbridled passion for the music and unyielding creative energy.

The latest tour is no exception – in fact, the band are set to crush like never before, taking no prisoners wherever they travel.

Born From Pain hit the UK for seven live dates in June and is particularly excited to be playing in Scotland for the first time. Prepare to be devastated.
